**Subject:** EECBG Grant Update

Dear potential EECBG applicant,

As you are aware, your city or borough is eligible for an Alaska Small City Energy Efficiency and Conservation Block Grant (EECBG). I am writing to give a brief update on the timing of the grant application.

The grant applications have not yet been released. We are working out many final details to make the application process smoother and faster once it is initiated. We are attempting to release the applications as soon as possible. It is difficult to estimate the timing, but we anticipate they will be released in the next couple weeks. Once released, cities will have approximately 30 days to complete the applications.

We are removing a step in the process by making your grant application also your grant agreement. Once submitted to Alaska Energy Authority and approved, we will sign and return the documents, which will commence the grant agreement.

We will post any updates and the application materials, when ready, on the Alaska Energy Authority web site page dedicated to the Alaska Small City EECBG: <http://www.akenergyauthority.org/eecbg.html>.

The application forms will also be emailed to each city's point of contact identified in the pre-application survey. If no survey was received, the applications will be emailed to the mayor's office. This email is being sent to the point of contact, the mayor's office contact, and any additional contact emails we have received.

Thank you for your patience as we work through the final details.
